AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (Currently Amended) An information display system comprising:

means for providing, on a screen of a computer, default sized display areas for a plurality of elements;

means for enlarging a corresponding, default sized display area when a user selects an element from said plurality of elements;

means for displaying additional ~~detailed~~ information for said selected element in said enlarged, corresponding display area; and

means for also displaying, on said screen, those elements that were not selected so that none of said elements are hidden under said enlarged, corresponding display area.

2. (Original) An information display system according to claim 1, wherein said means for displaying said unselected elements includes means for reducing sizes of said default sized display areas for said unselected elements and for summarizing contents displayed therein.

3. (Original) An information display system according to claim 1, wherein said means for displaying said unselected elements includes means for adjusting sizes of display areas of

said unselected elements to reflect a magnitude of relevancy of said unselected elements to said

selected element.

4. (Original) An information display system according to claim 1, further comprising

means for, when one of said plurality of elements is selected, adjusting arrangement on said

display screen of said display areas for said plurality of elements.

5. (Original) An information display system according to claim 1, wherein an element

that is related to an objective or the needs of the user is included in said plurality of elements.

6. (Currently Amended) An information display method comprising steps of:

providing, on a screen of a computer, default sized display areas for a plurality of

elements;

enlarging a corresponding, default sized display area when a user selects an element from

said plurality of elements;

pulling up detailed information for said selected element;

displaying said detailed information for said selected element in said enlarged,

corresponding display area; and

displaying, on said screen, those elements that were not selected so that none of said

elements are hidden under said enlarged, corresponding display area.

7. (Original) An information display method according to claim 6, wherein said step of displaying said unselected elements includes a step of reducing sizes of said default sized display areas for said unselected elements, and summarizing contents displayed therein.

8. (Original) An information display method according to claim 6, wherein said step of displaying said unselected elements includes a step of adjusting sizes of said display areas of said unselected elements to reflect a magnitude of relevancy of said unselected elements to said selected element.

9. (Original) An information display method according to claim 6, further comprising a step of, when one of said plurality of elements is selected adjusting arrangement on said display screen of said display areas for said plurality of elements.

10. (Original) An information display method according to claim 6, wherein an element that is related to an objective or the needs of said user is included in said plurality of elements.

11. (Currently Amended) A computer-readable recording medium for storing a program that permits a computer to perform steps of:

providing, on a screen of a computer, default sized display areas for a plurality of

elements;

enlarging a corresponding, default sized display area when a user selects an element from

said plurality of elements;

displaying additional ~~detailed~~ information not previously displayed for said selected

element in said enlarged, corresponding display area; and

displaying, on said screen, those elements that were not selected so that none of said

elements are hidden under said enlarged, corresponding display area.

12. (Currently Amended) A method of displaying information on a screen of a computer

comprising:

displaying on said screen a plurality of elements, each element is displayed in a default

sized display area;

enlarging a corresponding, default sized display area when a user selects an element from

said plurality of elements;

obtaining from a storage module ~~memory~~ at least one sub-elements of said selected

element;

displaying said at least one sub-elements for said selected element in said enlarged,

corresponding display area; and

displaying, on said screen, unselected elements so that none of said elements are hidden

under said enlarged, corresponding display area.

---

13. (New) The method of displaying information on a screen of a computer according to

claim 12, wherein when the user selects a sub-element from said sub-elements displaying a

subsequent level of information for said selected sub-element in said enlarged corresponding

display area so that none of said unselected elements and unselected sub-elements is hidden.

14. (New) The method of displaying information on a screen of a computer according to

claim 13, wherein said enlarged corresponding display area is further enlarged without hiding

any of said unselected elements and said unselected sub-elements.

15. (New) The method of displaying information on a screen of a computer according to

claim 12, further comprising, upon further selection of a different element by said user, enlarging

a corresponding display area of said different element and displaying said different element with

a sub-element not previously displayed in said corresponding display area, without hiding the

previously selected element with said sub-elements and any of said unselected elements.

16. (New) The method of displaying information on a screen of a computer according to claim 12 further comprising piercing a setting pin to a display area corresponding to an element thereby preventing enlargement and reduction of said display area upon further selections.
